

# Nicholas II Class I (NCTWX)

Style: Mid-Cap Growth March 31, 2014

Portfolio Manager: David O. Nicholas, CFA

## **Investment Philosophy:**

The advisor invests in high quality, long-term growth companies that meet our investment criteria, which includes

- A strategic position within their industry
- An enduring franchise, product or brand
- · Consistent, or improving, earnings growth and free cash flow
- · Low debt levels
- Reputable management with meaningful stock ownership
- Out-of-favor or undiscovered companies
- Stock price below long-term potential value

#### **Investment Approach:**

Nicholas II pursues long-term capital growth through a diversified stock portfolio of small- to medium-sized companies with capitalizations generally between \$500 million to \$10 billion. The Fund is typically benchmarked against the Russell Midcap Growth Index over a market cycle.

Expense ratio: 0.63%

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.nicholasfunds.com/returns.html or by calling 1-800-544-6547.

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectus contains this and other important information about the investment company, and it may be obtained by visiting www.nicholasfunds.com. Read it carefully before investing. Diversification does not assure a profit or protect against loss in a declining market.

Mutual fund investing involves risk; loss of principal is possible. The Fund invests in small and medium sized companies. Investing in small and medium sized companies involves greater risk than those associated with investing in large company stocks, such as business risk, stock price risk and liquidity.

Please refer to Page 2 for additional disclosures.

Russell Midcap® Index measures the performance of the 800 smallest companies in the Russell 1000 Index, which represent approximately 31% of the total market capitalization of the Russell 1000 Index. As of March 31, 2014, the weighted average market capitalization was approximately \$12.055 billion; the median market capitalization was approximately \$6.001 billion. The largest company in the index had an approximate market capitalization of \$35.705 billion.

Russell Midcap® Growth Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000 Growth index.

One cannot invest directly in an index.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or loses arising from any use of this information. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating TM (based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.)

Fund holdings and/or sector weightings are subject to change at any time and are not recommendations to buy or sell any security.

#### **Glossary of Terms:**

**EPS** Company total earnings divided by outstanding shares.

Free Cash Flow Free cash flow is cash flow available for distribution among all the securities holders of an organization.

Harmonic Price/Book Price per share divided by book value per share. The harmonic function reduces the impact of outliers in the denominator on the aggregate

calculation.

Price/Earning Capped PE is a valuation ratio of a company's current share price compared to its per-share earnings or in the case of REITs (real estate

investment trusts), their funds from operations. These weighted average values are limited in a range between 0 and 60.

**Sharpe Ratio** A measure of a fund's historical returns adjusted for risk, or volatility.

Standard Deviation Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 monthly

returns
